MANAGEMENT'S DISCUSSION AND ANALYSIS

Interim Financial Statements

In the opinion of management, all adjustments consisting only of normal recurring accruals necessary for a fair presentation of such amounts have been included. The results of operations for the quarter are not necessarily indicative of results for the year.

Newly adopted accounting pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers (Topic 606)*, and related amendments, which superseded all prior revenue recognition methods and industry-specific guidance. The core principle of Topic 606 is that an entity should recognize revenue to depict the transfer of control for promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the revenue principles, an entity is required to identify the contract(s) with a customer, identify the performance obligations, determine the transaction price, allocate the transaction price to the performance obligations and recognize revenue when the performance obligation is satisfied (i.e., either over time or point in time). Topic 606 further requires that companies disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.

Topic 606 provides companies an option of two transition methods, the full retrospective method, in which case the standard would be applied to each prior reporting period presented and the cumulative effect of applying the standard would be recognized at the earliest period shown, or the modified retrospective method, in which case the cumulative effect of applying the standard would be recognized at the date of initial application. The ASU is effective for annual reporting periods beginning after December 15, 2017.

Effective June 1, 2018 (beginning of fiscal year 2019), the Company adopted the requirements of Topic 606 using the modified retrospective method. The guidance was not applied to contracts that were complete at May 31, 2018, and the comparative information for the prior fiscal year has not been retrospectively adjusted.

The adoption of Topic 606 did not have a material impact on the Company's financial statements. The Company recorded a \$207,211 increase to its beginning retained earnings as the cumulative impact of adoption of the new revenue standard. The primary impact of the new standard was on certain fixed-price-milestone type contracts, on which the Company previously recognized revenue primarily using the latest milestone achieved and under Topic 606 are recognized using a different over-time output measure which was considered to more effectively measure the progress on uncompleted milestones. Additionally, certain fixed-price type contracts had previously recognized contract components on a separate basis and these components are now combined under Topic 606 into a single performance obligation, as they are not capable of being distinct under the new guidance. Furthermore, certain associated contract fulfillment costs are considered incremental and require capitalization and amortization over the expected customer life under Topic 606. The adoption of Topic 606 did not have a significant impact on the Company's revenue recognition policy for other types of contracts since revenues on the substantial majority of the Company's contracts continue to be recognized over time and use the same measure of progress that was applicable under prior standards. As a result of applying the modified retrospective method to adopt the new guidance, the following adjustments were made on the balance sheet as of June 1, 2018:

	As Reported May 31, 2018	Adjustments	Adjusted June 1, 2018
Assets:			
Accounts receivable - unbilled	\$ 9,265,372	\$ 259,635	\$ 9,525,007
Prepaid expenses	400,036	328,804	728,840
Liabilities:			
Deferred revenue	\$ 365,014	\$ 381,228	\$ 746,242
Stockholders' Equity:			
Retained earnings	\$ 15,740,999	\$ 207,211	\$ 15,948,210

In adopting Topic 606, the Company elected to use certain practical expedients permitted by the standard including using the portfolio approach where contracts with similar characteristics were assessed collectively to evaluate risk over the impact of Topic 606. The Company also elected to adopt the right-to-invoice practical expedient on cost-reimbursable, time-and-materials, and fixed-price-per-unit contracts where the Company recognizes revenues as it is contractually able to invoice the customer based on the control transferred to the customer.

Items of Note

In the first quarter of fiscal year 2019, which commenced on June 1, 2018, the Company realized net income of \$627,673, a 20.2% decrease compared to net income of \$786,698 for the first quarter of fiscal year 2018. See Results of Operations below for more detail on the decrease in net income.

During the first quarter of fiscal year 2019, and subsequent to the end of the quarter, the National Institute of Allergy and Infectious Diseases (NIAID) provided \$8,529,016 of incremental funding for existing task orders under the contract entitled "Housing and Maintenance of Non-Human Primates for NIAID-VRC." The new funding covers costs incurred through September 27, 2019. The five-year contract (which expires on September 27, 2019) has a maximum potential funding amount of \$43,077,850 including all options. The contract's current total funding is \$30,894,902. There are, however, no assurances that the Company will be awarded any other task orders under this contract. Of the remaining \$12,182,948 of unobligated contract amount, the contract includes options totaling \$7,134,129 related to Biosafety Level 2 research utilizing ferrets and Biosafety Level 3 research utilizing both ferrets and nonhuman primates that are not likely to be exercised during the term of the contract.

During the first quarter of fiscal year 2019, the NIAID notified the Company of the awards of Task Order "Immunogenicity Testing of A Salmonella Paratyphi A Vaccine in Mice" under Part A and Task Order "Refinement of a Pig-Tail Macaque Model of Gonococcal Infection" under Part B of the Pre-Clinical Models of Infectious Diseases (PCMID) Master Contract. The Part A task order totals \$125,064 and is funded to cover costs incurred through December 9, 2019. The Part B task order totals \$1,705,236 and is funded to cover costs incurred through November 23, 2019.

Additionally, subsequent to the end of the first quarter, the NIAID notified the Company of the

award of Task Order “Ferret Models for the Evaluation Vaccines and Vaccination Strategies” under Part A of the PCMID Master Contract. This is the third task order awarded under the Master Contract, and totals \$2,392,250 including all options. The current funding under the task order is \$858,192 to cover costs incurred through March 16, 2020. There are, however, no assurances that the Company will be awarded any other task orders under the PCMID Master Contract or that any options will be exercised.

Based on fiscal year 2018 earnings, the Board of Directors declared a cash dividend of \$.60 per share for shareholders of record on September 19, 2018. The dividend was paid on October 10, 2018.

Results of Operations

The \$948,116 increase in revenues to \$9,652,869 for the quarter ended August 31, 2018, compared to \$8,704,753 for the quarter ended August 31, 2017, is primarily the result of increases in contract activity in government contracts of approximately \$500,000 and increases in the commercial sector of approximately \$600,000 compared to the first quarter of the previous fiscal year. The increase in revenues was partially offset by a decrease in revenue generated by federal grants of approximately \$150,000.

The \$1,392,107 increase in contract operating expenses for the quarter ended August 31, 2018, primarily reflects increases in expenses incurred of approximately \$885,000 related to subcontractors, the purchase of nonhuman primates, an increase in depreciation expense resulting from the increase in capital expenditures in the previous fiscal year and higher labor costs of approximately \$400,000 (half of which is indirect labor) compared to similar costs incurred in the first quarter of the previous fiscal year.

The \$505,010 decrease in operating income primarily reflects the higher increase in contract expenses than in revenues. Additionally, the fee percentage applied to subcontractor costs incurred on government contracts results in the generation of less revenue than fee percentages applied to costs on commercial contracts.

Liquidity and Capital Resources

During the first quarter of fiscal year 2019, the Company directed approximately \$339,000 towards capital expenditures compared to approximately \$699,000 in the first quarter of fiscal year 2018. These expenditures were necessary to provide additional equipment and nonhuman primate (NHP) and rodent cages for research being performed in the Company’s laboratories. The Company has been able to continue to fund all of these expenditures through the use of available cash provided by profits.

During the next nine months, the Company estimates the aggregate purchase price of equipment to upgrade older equipment, enhance its capabilities, add nonhuman primate and small animal caging, and to renovate animal housing space will total approximately \$1,600,000.

The Company is obligated, as lessee, under non-cancelable operating leases covering its facilities and certain equipment at various dates through 2026. Rent expense for the first quarter of fiscal year 2019 was approximately \$829,000. As of August 31, 2018, the total of the future minimum

rental payments is approximately \$19,012,000.

Other than the items mentioned above, the Company does not anticipate other substantial capital and other expenditures during fiscal year 2019. However, if the Company is awarded new contracts that require additional equipment or animal enclosures during that period, the Company believes it will have sufficient capital resources to provide for the purchase of the equipment.

BIOQUAL has a \$2,000,000 line of credit with M&T Bank available to help cover costs of its daily operations. The line of credit is due on demand and renewable annually. As of August 31, 2018, there was no balance due on the line of credit. The interest rate on funds drawn on the line of credit is the prime rate plus .25%, which as of August 31, 2018, was 5.25%. On August 31, 2018, the Company had a balance of cash and cash equivalents of \$10,347,392. As part of the funding of the February 2014 acquisition of the Advanced Biosciences Laboratories, Inc. *in-vivo* animal model services-related business, the Company obtained a \$1,500,000 note from M&T Bank. The term note is payable in 60 monthly payments of \$28,087.40, with the final payment to be made on February 28, 2019. With the above line of credit and the cash resources expected to be available as a result of collection of accounts receivable, the Company believes it will have sufficient capital resources to provide for daily operations and its capital needs through the end of fiscal year 2019.

The following provides additional information on select balance sheet items: 1) the \$138,558 decrease in accounts receivable reflects the collection of several past due invoices during the first quarter of fiscal year 2019 offset by a net increase in unbilled accounts receivable reflecting increases related to the restatement of the prior year ending balance due to the adoption of Topic 606 offset by decreases to amounts to be billed upon completion of contract milestones; 2) the \$454,196 decrease in accrued compensation and related liabilities primarily reflects the payment of the accrued fiscal year 2018 bonuses during the first quarter of fiscal year 2019; 3) the \$442,852 increase in prepaid expenses reflects prepayment of annual liability and workers compensation insurance premiums, real estate taxes and deposits for the purchase of nonhuman primates for future studies and new equipment as well as an increase in prepaid expenses related to the adoption of Topic 606 and 4) the \$275,373 increase to deferred revenue primarily reflecting increases due to the adoption of Topic 606 offset by meeting certain milestones for which advance payments had previously been received on certain commercial contracts. Refer to the Statements of Consolidated Cash Flows on Page 4 for further detail related to the changes in cash and cash equivalents.

Revenue recognition accounting policy

Revenue Recognition: The Company's revenues from contracts with customers are for support provided to the National Institutes of Health (NIH) for research services for certain diseases and medical research areas, including cancer, AIDS, hepatitis, influenza, immunology, transgenics, contraception, neurobiology and behavior., The Company's contracts are either directly with NIH or with entities providing research services for NIH.

The Company performs under various types of contracts, which include cost-reimbursable or cost-plus-fixed-fee (CPFF), time-and-materials (T&M), fixed-price-per-unit (FP-U), and fixed-price-milestone (FP-M) contracts.

To determine the proper revenue recognition, the Company first evaluates whether it has a duly approved and enforceable contract with a customer, in which the rights of the parties and payment terms are identified, and collectability is probable. The Company also evaluates whether two or more contracts

should be combined and accounted for as a single contract, including the purchase or work orders issued under a Master Services Agreement (MSA) or similar. In addition, the Company assesses contract modifications to determine whether the changes to existing contracts should be accounted for as part of the original contract or as a separate contract. Contract modifications for the Company generally relate to changes in contract scope and related requirements, more specifically, additional testing, studies, or similar analysis that do not add distinct services, and therefore are accounted for as part of the original contract. If contract modifications add distinct goods or services, such as additional studies that are distinct from the original or previous study(ies), and increase the contract value by the standalone selling price, those modifications are accounted for as separate contracts.

Most of the Company's contracts comprise multiple promises which can include the procurement of the appropriate animal models if not already provided by the customer or by the Company, provisions for the care and housing of the animals, and services provided for the testing, studies, and/or analysis. In all cases, the Company assesses if the multiple promises should be accounted for as separate performance obligations or combined into a single performance obligation. The Company generally separates multiple promises in a contract as separate performance obligations if those promises are distinct, both individually and in the context of the contract. If multiple promises in a contract are highly interrelated or comprise a series of distinct services performed over time, they are combined and accounted for as a single performance obligation. A single performance obligation will result, in most cases, where the animals are directed by the customer at the outset of the original contract to be euthanized since there was determined to be no distinct value within the context of the contract, for the animals, including their care and housing, apart from the studies and testing services. The FP-M type contracts primarily encounter this directive and as a result, often have a single performance obligation.

The Company's contracts often contain options to extend a study, perform a follow-on study, or perform a new study which is separate and distinct from the original or previous study(ies). The options generally result in modifications to the contract and therefore, the policies governing the accounting for modifications will apply. Since the options will generally contain the same terms and conditions, including pricing terms, such options typically do not provide the customer with any material rights under the contract.

Contracts with the U.S. Federal government are subject to the Federal Acquisition Regulations (FAR) and priced based on estimated or actual costs of providing the goods or services. The FAR provides guidance on types of costs that are allowable in establishing prices for goods and services provided to the U.S. government and its agencies. Each contract is competitively priced and bid separately. Pricing for non-U.S. government agencies and commercial customers is based on specific negotiations with each customer. The Company excludes any taxes collected or imposed when determining the transaction price. The transaction prices associated with the Company's CPFF and T&M contracts are variable. These variable amounts are estimated at the most likely amount that the Company expects to be entitled to based largely on an assessment of the Company's anticipated performance and all information (historical, current, and forecasted) that is reasonably available and the potential of significant reversal of revenue.

The Company allocates the transaction price of a contract to its performance obligations in the proportion of its respective standalone selling prices. The standalone selling price of the Company's performance obligations is generally based on an expected cost-plus margin approach with relatively consistent margins applied within each major customer group. Substantially none of the Company's contracts contain a significant financing component, which would require an adjustment to the transaction price of the contract.

The Company recognizes revenue on a majority of the performance obligations within each contract over time as there is continuous transfer of control to the customer over the duration of the contract as the Company performs the promised services. For U.S. Federal government contracts, continuous transfer of

control to the customer is evidenced by clauses in the contract that allow the customer to unilaterally terminate the contract for convenience, pay for costs incurred plus a reasonable profit and take control of any work-in-process. Similarly, for non-U.S. government contracts, the customer typically controls the work-in-process as evidenced by rights to payment for work performed to date plus a reasonable profit to deliver products or services that do not have an alternate use to the Company. In certain cases, when no euthanasia is directed by the customer at the outset of the contract, the animals may be re-purposed for a new or different and distinct study. In these cases, the re-purposing is generally not known until the end or close to the end of the original or previous study; however, this would indicate that the animals could potentially have an alternative use. Therefore, where there is a separate performance obligation associated with the procurement of the animals, the Company recognizes revenue at a point in time using a rate per unit as the animals are procured and the customer obtains control.

On FP-M contracts, for the performance obligation(s) where revenue is recognized over time, generally uses a method that measures the extent of progress towards completion of a performance obligation, principally using an output method. Under the output method, revenue is recognized based on the best measure of progress relevant to the performance obligation and services provided. The output measure primarily used is a method in which revenue is recognized based upon the proportion of total study-related procedures and/or tests performed to date to estimated total procedures and/or tests through completion of the study. This ratio is computed using the value associated with each procedure and/or test performed since certain procedures could be considered more valuable than others. Additionally, on certain FP-M contracts where the care and housing of the animals is considered a separate performance obligation, revenue is recognized over time using a straight-lined method since control of the services is provided to the customer relatively evenly over the period of performance. On certain other contracts, principally T&M, FP-U, and CPFF, revenue is recognized using the right-to-invoice practical expedient as the Company is contractually able to invoice the customer based on the control transferred to the customer.

Contract costs generally include direct costs such as those associated with procuring the animal models, materials, labor, subcontract costs, costs for housing and care of the animals, and indirect costs identifiable with or allocable to a specific contract. Costs are expensed as incurred, except for costs associated with procuring the animals for contracts where the animals are directed to be euthanized by the customer. Such costs are capitalized and amortized on a straight-line basis over the expected life of that contract. The Company does not incur significant incremental costs to acquire contracts.

Billings under cost-based government contracts are calculated using provisional rates which permit recovery of indirect costs. These rates are subject to audit on an annual basis by the government agencies' cognizant audit agency. The cost audits will result in the negotiation and determination of the final indirect cost rates which the Company may use for the years audited. The final rates, if different from the provisional rates, may create a receivable or a liability.

As of August 31, 2018, the Company had negotiated final settlements on indirect cost rates through 2011. The Company periodically reviews its cost estimates and experience rates, and adjustments, if needed, are made and reflected in the period in which the estimates are revised. In the opinion of management, redetermination of any cost-based contracts for the open years will not have any material effect on the Company's financial position or results of operations.

Changes in estimates related to contracts with performance obligation(s) accounted for using the output method on FP-M type contracts, that is primarily based on a proportion of study-related procedures and/or tests, are recognized in the period in which such changes are made on a cumulative catch-up basis. This basis recognizes in the current period the cumulative effect of the changes on current and prior periods based on the performance obligations' related proportionate progress towards completion.

For the three months ended August 31, 2018, there were no material modifications recorded related to work previously performed on contracts prior to the execution of formal modifications or amendments. A significant change in one or more estimates could affect the profitability of one or more of the performance obligations.

Revenue From Contracts With Customers

Dual Reporting: The effects to the financial statements as of and for the three months ended August 31, 2018, as a result of applying Topic 606, rather than previous GAAP (ASC 605), are as follows:

	As Reported (Topic 606)	As Adjusted (ASC 605)
Assets:		
Accounts receivable - unbilled	\$ 2,040,016	\$ 2,020,387
Prepaid expenses	842,878	623,036
Income taxes receivable	167,925	49,725
Liabilities:		
Deferred revenue	\$ 640,387	\$ 204,170
Stockholders' Equity:		
Retained earnings	\$ 16,575,883	\$ 16,654,429
Contract revenue	\$ 9,652,869	\$ 9,947,864
Contract expenses	7,645,940	7,536,979
Operating income	868,745	1,272,701
Income before income taxes	887,173	1,291,129
Provision for income taxes	259,500	377,700
Net income	627,673	913,429
Basic earnings per share	\$ 0.70	\$ 1.02
Diluted earnings per share	\$ 0.70	\$ 1.02

The changes reflected above were primarily due to certain fixed-price-milestone type contracts, on which the Company previously recognized revenue using the latest milestone achieved and under Topic 606 are recognized using a different over-time output measure which was considered to more effectively measure the progress on uncompleted milestones. Additionally, certain fixed-price type contracts had previously recognized contract components on a separate basis and these components are now combined under Topic 606 into a single performance obligation, as they are not capable of being distinct under the new guidance. Furthermore, certain associated contract fulfillment costs are considered incremental and require capitalization and amortization over the expected customer life under Topic 606.

Remaining Performance Obligations: Remaining performance obligations represent the expected value (transaction price) of executed contracts, both funded and unfunded, less revenue recognized to date. Remaining performance obligations do not include future potential purchase or work orders expected to be awarded under MSA or similar agreements.

As of August 31, 2018, the Company expects to recognize a majority of the remaining performance obligations over the next 12 months.

Disaggregation of Revenues: The Company disaggregates revenue by customer-type and contract-type as these categories best represent how the nature, timing and uncertainty of the Company's revenue and cash flows are affected by the U.S. government procurement environment and economic factors.

Disaggregated revenue by customer-type and contract type was as follows:

Revenue by Customer Type and Contract Type	Three Months Ended August 31, 2018
National Institutes of Health (NIH)	
Cost-Plus-Fixed-Fee	\$ 1,169,927
Fixed-Price-Per-Unit and Time-And-Materials	1,805,799
Fixed-Price-Milestone	<u>97,627</u>
Total National Institutes of Health	<u>3,073,353</u>
Commercial and Other	
Fixed-Price-Per-Unit and Time-And-Materials	\$ 4,150,616
Fixed-Price-Milestone	<u>2,428,900</u>
Total Commercial and Other	<u>6,579,516</u>
Total Revenues	<u>\$ 9,652,869</u>

CPFF contracts are generally lower risk and have lower profits. T&M and FP-U contracts are also low risk but profits may vary depending on actual labor costs compared to negotiated contract billing rates. FP-M contracts offer the potential for higher profits while increasing the Company's exposure to risk of cost overruns.

Contract Assets and Liabilities: Contract assets include unbilled contract receivables, which is the amount of revenue recognized that exceeds the amount billed to the customer, and right to payment is not just subject to the passage of time. Contract assets also include incremental fulfillment costs where, under certain FP contracts, costs are incurred usually at the beginning of the contract performance, where the single performance obligation has not yet been completely satisfied. Contract liabilities consist of deferred revenue.

The components of contract assets and contract liabilities consisted of the following:

		August 31, 2018	June 1, 2018 (1)
Contract assets:	Balance sheet line item:		
Unbilled contract receivables (2)	Accounts receivable - unbilled	\$ 2,040,016	\$ 2,183,698
Fulfillment costs	Prepaid expenses	<u>219,842</u>	<u>328,804</u>
		<u>\$ 2,259,858</u>	<u>\$ 2,512,502</u>
Contract liabilities:	Balance sheet line item:		
Deferred revenue	Deferred revenue	<u>640,387</u>	<u>\$ 746,242</u>

The increase in "Contract assets" was primarily due to the timing of billings and revenue recognized on certain contracts. The increase also relates to fulfillment costs being capitalized on certain contracts, offset by amortization for the quarter ended August 31, 2018. The increase in "Contract liabilities-current" was primarily due to billings in excess of revenue recognized on certain FP-M contracts.

During the quarter ended August 31, 2018, the Company recognized revenue of approximately \$122,000 relating to amounts that were included as a contract liability at June 1, 2018.

During the quarter ended August 31, 2018, the Company recognized approximately \$159,000 of amortization related to its fulfillment costs. The Company did not recognize any impairment losses on contract assets for the quarter ended August 31, 2018.

- ⁽¹⁾ Includes the cumulative effect of the changes made to the Company's opening balance sheet at June 1, 2018, as a result of the adoption of ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*.
- ⁽²⁾ Balances include primarily timing differences between what the Company has billed or has the right to bill as of the period end as compared with the revenue recognized, on FP-M and CPFF type contracts.

Forward Looking Information

Statements herein that are not descriptions of historical facts are forward-looking and subject to risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors including risks relating to the ability to continue to extend current government contracts and obtain new contracts; the Company's ability to obtain new government or commercial contracts; continued demand for the use of animal models in scientific research; the Company's ability to perform under its contracts in accordance with the requirements of the contracts; the actual costs incurred in performing the Company's contracts and its ability to manage its costs, including its capital expenditures; dependence on third parties; future capital needs; the ability to fund its capital needs through the use of its cash on hand and line of credit; and the future availability and cost of financing/capital sources to the Company.
